

## Multifeeds

MF series

**art. 11-097**  
**MF2 PO G**

Ideal for the reception of several satellites because it allows the use of 2 LNB with a single dish.

The distance between two satellites is expressed in degrees.

If the distance in degrees between the two satellites isn't change, with the increase of the dish diameter also increases the distance between the focal point and the secondary focal points.

It is sold already assembled. Feeder clamps for LNB Ø 23 are supplied.
