

UHF antenna SPEED+ 5G series

art. 21-375B SPEED+ 43 5G BIANCA

Designed to maximize the reception of DTT signals in the range E21÷E48 attenuating the LTE 700 MHz band without preventing the proper functioning of channel E48.

High-performance dipole, meticulously designed to maximize performance, with innovative and practical design at the same time, with openable lid to ensure maximum weather resistance without sacrificing a smooth insertion of the F connector.

The elements and their support are reinforced. This characteristic makes the antenna particularly sturdy.
