

# UHF antenna with three cradles <br> TRIO+ 5 G series <br> art. 21-457B TRIO+ 5G BIANCA 

Designed to maximize the reception of DTT signals in the range E $21 \div$ E48 attenuating the LTE 700 MHz band without preventing the proper functioning of channel E48.
New high-performance dipole, meticulously designed to maximize performance, with innovative and practical design at the same time, with openable lid to ensure maximum weather resistance without sacrificing a smooth insertion of the F connector.

The three cradles structure and the mechanism of deployment ensure high efficiency, high gain and a quick and easy installation, being pre-assembled type antenna.
